

JOINT ATOMIC ENERGY INTELLIGENCE COMMITTEE

MEMORANDUM FOR: General Graves B. Erskine
Assistant for Special Operations
Office Secretary of Defense

SUBJECT : Representation on JAEIC

1. The Joint Atomic Energy Intelligence Committee (JAEIC) was established as a permanent interdepartmental subcommittee of the Intelligence Advisory Committee to co-ordinate the atomic energy intelligence activities of the Government. Upon the formation of the U. S. Intelligence Board, all committees or working groups established by the IAC and the USCIB were directed to continue to function under their existing terms of reference until such time as their organization or functions may be changed by USIB action. They were also directed to consider whether any changes in their existing organizations or functions may be appropriate.

2. We shall probably be engaging in the near future in a review of the mission and functions of JAEIC to bring them into line with the new USIB organization. In view of your membership on the USIB, I should like to extend an invitation for you to appoint a representative and alternate to JAEIC to take part in this review of mission and functions and to participate on a regular basis in the work of the Committee.
